Subject: Gail Fisher (Yucca Mountain Rail Route)

Part of Records Package / Supplement / Correction

---

Dear Gail:

A coal-carrying transport overturned on the proposed route for the Yucca Mountain-bound spent nuclear fuel. Train track neighbors in the Webster Groves suburb were already afraid of the nuclear waste traveling through their back yards. They're terrified, now.

I was hoping to get some information from the DOE about the route and if today's derail incident has any impact on the proposed route. If you could please contact me (or any other news staff) at any of the listed numbers, I would sure appreciate it. It would help set our listeners minds at ease to know that they are not in danger. Thank you for your cooperation.

Yours,

---
